**Compressed (to load faster):** [genesis.re/Network-State-Genesis-WHITEPAPER-compressed.pdf](https://genesis.re/Network-State-Genesis-WHITEPAPER-compressed.pdf)

**ETH address:** 0x3EF61d25b2Bf303DE52efdd5e50698BED8f9eB8d

## V2 (new one on Arbitrum):

**Much lower starting price:** 10% of the original, making it affordable, different market conditions.

**Deployed on Arbitrum:** 0x7ba6310416b3791ccd967219525b2cebfce14cc8<sup>1</sup>

The lower price will allow broader distribution, as well distributing to GG20 (Gitcoin Grants) participants that mostly happened on Arbitrum.

## Where are we right now?

**WOW**

The world evolved.

It was April 2021 when Balaji posted the initial version of The Network State.

We were already thinking along the same lines<sup>2</sup>:

Not only missed, but loads of global heating in the pipeline. Not only changing, but the rate of change is accelerating.

Screenshot from <https://tellthetruth.media> - "tell the truth" is one the demands of Extinction Rebellion, it's pretty fundamental and pretty agreeable. Media is not doing a proper job in reporting in what is really happening with the climate:

## CURRENT STATUS

- Measurements with delay
- Scientific papers with delay
- IPCC reports with delay
- Climate itself acts with delay
- Rearranging the deck chairs on the Titanic

## POLITICISED PROCESS

Impossible to get unanimous consensus among 200 parties:

- Russia - UN Security Council veto
- Saudi Arabia, Quatar - oil
- Brazil, Argentina - beef
- United States - previous president climate change denier

In fact no one really knows what is going on, climate models are obsolete<sup>5</sup>, new interdependencies are being discovered all the time. It's bad... And the attention of the world is focused on local conflicts that have potential to escalate. And obviously CO<sub>2</sub> coming from the military.

Even António Guterres (Secretary-General of the UN) appears helpless.

António Guterres ✅  
@antoniofoterres

Climate activists are sometimes depicted as dangerous radicals.

But the truly dangerous radicals are the countries that are increasing the production of fossil fuels.

Investing in new fossil fuels infrastructure is moral and economic madness.

This is the view today from my office in our @United Nations Headquarters in New York City, as smoke from the Canada wildfires moves south, plummeting air quality across much of the northeastern USA.

This is something more and more people experience every year across the world. Half of humanity is in the danger zone from wildfires and other extreme weather events such as floods, droughts and extreme storms.

With global temperatures on the rise, the need to quickly reduce wildfire risk is more critical than ever.

We're running out of time to make peace

# So what do you do?

**Staying alive.**

Building a new system, protesting the old, staying alive in some eco-village community that is resilient to whichever comes next. Multidimensional approach. Yes and, yes both, having multiple exit options, including emergency food supply.

Multidimensional approach. Reducing emissions, negative emissions, individual action, collective action, from the left, from the right, from the bottom, from the top, from the inside, from the outwards, bending over backwards.

Just don't tell me "take shorter showers":

The incentive is to exploit water before others do it. Incentives as the driving force of the universe. Incentive to stay alive, deeply embedded in human genes, everyone who lives is winning in this game 😊

## (R)evolution

Pretty good talk from UnDavos: <https://www.youtube.com/watch?v=1w11n-7PNhE>

It has "Peaceful" in name simply because loads of people associate revolution with force.

The image shows a video player interface. At the top left is the UND logo. The main video frame on the left shows a person speaking into a microphone. To the right is a large poster with the text "UNIFYING NARRATIVE", "BELIEF", and "POSITIVE FUTURE" overlaid on a background of a globe and puzzle pieces. Below the video frame is a progress bar at 2:54 / 5:50. To the right of the progress bar are various control icons. The title "Peaceful (R)evolution Ignite Talks" is displayed below the video frame.

It is possible. It all starts from the belief. Unifying narrative. Positive and abundant future.

# OPERATING SYSTEM FOR THE PLANET GREAT RESET BUT ON OUR TERMS WE ARE THE 99%

## EDUCATION and SENSEMAKING

Unifying narrative  
Tell the truth - information not entertainment

## ENERGY and INFRASTRUCTURE

Global energy grid  
Loads of jobs created in clean energy  
Circular economy  
“Swords into ploughshares”  
(repurposing military capacity)

## LAW and ECONOMICS

Restructure unsustainable debt  
(compound interest, exponential growth)  
Stop ecocide  
Global emission trading system  
Price for CO2  
Accounting for nature and future generations

## FOOD SYSTEM and LAND USE

Reducing headcount of livestock  
Growing food for humans, not animals.  
Hemp - miracle crop, captures CO2, enriches soil  
Land workers - fair transition for AI displacement

## END WAR NOW

Putin exit option - mental health issue  
Just like Hitler - got high on drugs and power  
Forgiveness. Empathy. MDMA healing PTSD
